HV-ES™ Energy Saving Air Exchange Fan

The compact HV-ES Air Exchange Fan from APS Resource creates a focused column of air that forces hot, cold or musty air from the trailer replacing it with fresh air. Unlike traditional blade fans that create a broader movement of air, the HV-ES Fan creates a continuous stream of fresh air that improves the work environment increasing comfort and productivity. The HV-ES Fan's 980 CFM output provides more airflow at lower amperage than any comparable truck fan on the market!

HV-ES™ Fan Features:

- Maximum - 980 CFM output
- Powerful 1/3 HP, 115V, 2.8 Amp, energy efficient motor
- Durable polyethylene construction withstands impacts
- Dual articulating arm for precise positioning
- Easy-grip handle provides convenient adjustment point
- Lightweight, compact size
- Blade-guard for safety
- Includes extra long power cord with 3-prong 115V plug
- Thermally protected to prevent overheating

The HV-ES Fan creates a focused column of air that forces hot, cold or musty air from the trailer replacing it with a stream of fresh air.
