

## Wheel Risers & Yardramps

### Wheel Risers

*Avoid Unsafe or Inefficient Loading from your Dock Being Too High for Trailers*

- ▼ Available in Aluminum or Steel
- ▼ Saves on asphalt or concrete construction costs
- ▼ Heights up to 12"
- ▼ Provides portable or permanent positioning at your dock
- ▼ Lengths to accommodate single, dual or tandem axle trailers
- ▼ Custom sizes available

### Steel Yardramp

*Your Solution to Yard Bottlenecks and Multi-Application/Location Requirements*

Designed to facilitate freight handling, these portable Steel Yardramps can be rolled anywhere in your yard where you need fast freight handling. Away from the dock, Steel Yard Ramps can eliminate bottlenecks caused by a trailer standing in your yard when all the docks are busy. It can also be used for railcars. The operator utilizes a self-contained, double acting hydraulic pump to adjust the unit to the proper position. Open steel grating provides excellent traction while preventing build-up of snow, water or debris.

- ▼ Self-cleaning grating
- ▼ Hydraulic leveling system
- ▼ 36' level-off models are ideal for truck or railcar
- ▼ 30' models without level-off are ideal for docks
- ▼ 18" solid rubber pneumatic profile tires
- ▼ Heavy-gauge tubular steel box undercarriage assembly
- ▼ Optional towing bar for moving long distances via forklift
- ▼ Ramp loop for forklift positioning

## A Family of Products & Service Parts for All Your Aftermarket Needs

*APS Resource is the Industry Leader for Dock Leveler and Restraint Service Parts*

### Energy Saving Products

- ▼ Weatherseal for Dock Levelers & Doors
- ▼ Door Sealers
- ▼ Wear Pleats

### Safety & Lighting Products

- ▼ Dock Lights
- ▼ Trailer Jacks
- ▼ Wheel Chocks
- ▼ Guide Stripes & Lights

### Planned Maintenance

- ▼ Maintenance Programs
- ▼ Conversion Kits
- ▼ Service Parts
- ▼ Upgrade Kits

### Protective Systems

- ▼ Rail Systems
- ▼ Bollards & Protectors
- ▼ Bumpers
- ▼ Door Savers
- ▼ Security Gates

## Edge-of-Dock Levelers

A permanent option to portable plates and dockboards. Now available in push-button, Air and Hydraulic units! All units available in 20,000 and 30,000 lb. capacities. Since they mount to the outside of the building, no pit is necessary, making them the perfect economical solution for medium traffic docks.

### Edge-of-Dock Air Leveler

**The Proven, Low Maintenance Design of Air Activation is Now Available in an Edge-of-Dock**

The APS Resource EOD meets today's demands for greater safety, easier operation and rugged dependability at the loading dock. It features simple ergonomic push-button operation with a high volume, low pressure, air bag lifting mechanism.

- ▼ Push-button operation
- ▼ Broad working range
- ▼ Reinforced, factory installed molded rubber bumpers
- ▼ High volume, low pressure, air bag lifting mechanism
- ▼ If punctured, bag is still operational and repairs easily
- ▼ Lifting bag is fully operational under extreme temperatures of -65° to +180° F
- ▼ Mechanical lip extension
- ▼ Durable construction

Simple Push-Button Activation

### Edge-of-Dock Hydraulic Leveler

**The Durability of Hydraulics Also Available in Edge-of-Dock**

Easy to operate, fully hydraulic activation is now available in our affordable Edge-of-Dock Hydraulic Levelers. With push-button activation, the Hydraulic Edge-of-Dock is quickly and efficiently put in place for use.

- ▼ Easy push-button operation
- ▼ Reliable, efficient hydraulic lifting mechanism
- ▼ Unit can be operated manually in event of power failures
- ▼ Reinforced, factory installed, molded rubber bumpers
- ▼ Broad working range, 5" above and below dock
- ▼ Durable construction

Simple Push-Button Activation

### Edge-of-Dock Mechanical Leveler

**The Standard Mechanical Unit has Proven Itself in Many Applications**

An affordable alternative to Portable Plates, the Edge-of-Dock Mechanical Leveler is easy to operate. It is installed permanently to stay put.

- ▼ Easy lever operation – no lifting required!
- ▼ Economical
- ▼ Easy, fast installation
- ▼ Reinforced, factory installed, molded rubber bumpers
- ▼ Durable construction

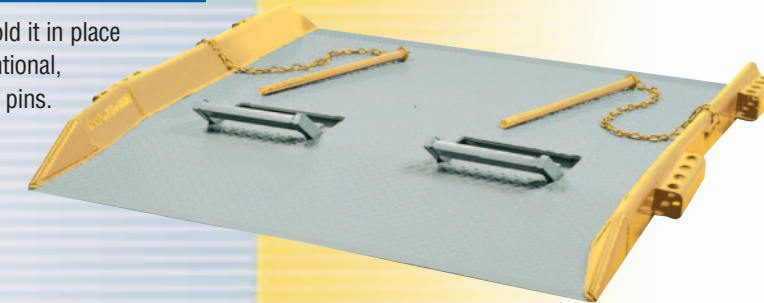

Easy Lever Operation

## Dockboards

### Heavy-Duty Steel Dockboards

This sturdy dockboard uses two heavy-duty, 1"-thick steel pins to hold it in place and guard against slipping. Simply select the proper hole for conventional, refrigerated, container trailers, or below dock conditions, then insert pins. Double bend design for smooth loading.

- ▼ Two 4-hole pin pockets placed on each end
- ▼ Integral, all-welded, steel anti-runoff curbs
- ▼ Tough, fold-down, forklift loops for safe, fast positioning
- ▼ Capacities from 15,000 to 40,000 lbs.
- ▼ Available in widths from 60" to 84"

### Steel Dockboards with Lifting Chain

**Your Solution to Costly or Unsafe Leveling Solutions for Light-Duty Applications (10,000 lb. capacity)**

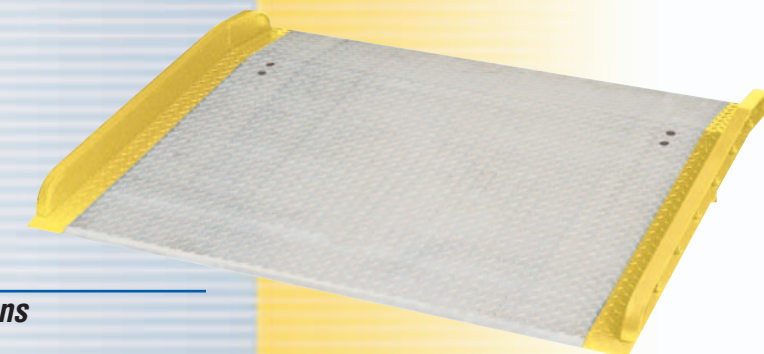

- ▼ Bolt-on steel curbs prevent loading equipment run-off
- ▼ Locking legs for safe loading
- ▼ Capacities up to 10,000 lbs.
- ▼ Forklift chains included

### Aluminum Dockboards with Steel Curbs

**Eliminate Safety Hazards from Equipment Run-off for Medium-Duty Applications (10,000 - 15,000 lb. capacity)**

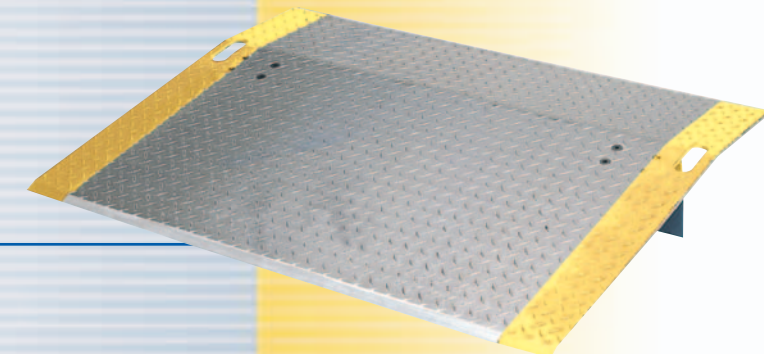

- ▼ Bolt-on steel curbs to prevent loading equipment run-off
- ▼ Locking legs for safe loading
- ▼ 11° lip bend and beveled deck edges for smooth transition
- ▼ 11" standard lip length for conventional trailers
- ▼ 14" lip length available for refrigerated applications
- ▼ Available in 60" to 72" widths and 36" to 72" lengths

### Aluminum Dock Plates

**Your Solution to Costly or Unsafe Leveling Solutions for Nonpowered Loading Applications**

- ▼ Ideal solution for pallet trucks and other nonpowered loading equipment
- ▼ Bolt-on steel legs for safety
- ▼ 11° lip bend and beveled deck edges for smooth loading
- ▼ 11" standard lip length for conventional trailers
- ▼ 14" lip length available for refrigerated applications
- ▼ Wide variety of sizes available

### Rail Dock Plates

**Consult Factory for Application Requirements**

- ▼ Custom built for your application
- ▼ Numerous sizes and capacities available
